# SECRETS OF THE GOLDEN TOWER!

I'm Hitomi, the newest pilot on the EXO-FORCE team. My mission is to guard the Golden Tower, the most important building in the Golden City. This is where we keep our EXO-codes, repair our battle machines, and train to fight Meca One and his robot army. This hi-tech tower may be the key to victory over the robots!

During the first fight for the Golden Tower, the robots hid a transmitter somewhere in the tower. Whenever the computer tells us the location of a new code, they find out too, and they can get there as fast as we do! If only we could figure out where it is...

LEGO EXO-FORCE

Watch out, robots! It's not as easy to get inside as you might think. The tower's walls are heavily armored, and the door only opens if you know the secret mechanism to activate it.

Even when its door is open, the Golden Tower is far from defenseless. These hidden homing rockets can seek out enemy targets and knock them down!

Deep inside the tower is the central computer for the entire city. Each time we enter a new EXO-code and place it in the security vault, it reveals something new. It's given us new battle machines, information about the city and Sentai Mountain, defense technology, and more. We never know what we'll get when we punch in a code, but one thing's for sure - if the robots ever get their hands on it, we're in trouble!

This is the Sonic Raven, the robots' newest air strike vehicle. Its double spinning turbines and flame jets give it a real boost in the sky, and those blaster cannons and rockets can do some major damage. As guardian of the tower, it's my job to keep an eye out for these and other attackers – and blast them out of the sky if I see them coming!

Robots that attack the Golden Tower are in for a surprise. Hidden high at the top is a rotating blaster cannon that can put the hurt on even the toughest robot battle machine.

The second floor of the tower is the training room. Here, our leader Sensei Keiken teaches us how to fight in and out of our battle machines. Everyone on the mountain is counting on us to win, so we practice hard every day.

If all else fails, we've got one secret weapon left to use against the robots. If they get too close to the tower, this emergency catapult can send code plates flying to drive them off!

# BULLET RUN RACE!

The Bullet Run race is not your Fast and Furious custom street racers are roaring down the road, jumping over and crashing through everything in their way. Can you guess which one will reach the finish line first? Follow the roads and see...and may the best Ting Turbo win!

My favorite racer has the sleek curves and rear spoiler to win any race. It's definitely the coolest!

No way! With its big wheels and exposed engine, my racer is built for power. On-road or off-road, it drives over anything in its way!

You're both wrong! My favorite racer's not just fast, it's also got enough seats to fit all my friends. You can't get better than that!

My racer is ultra-modern and hi-tech. It'll leave the other three in the dust while it's blasting to the finish line!
